

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### Class A EUR Share Class of NEAM FUND A (the Fund) a sub-fund of NEAM Global Funds ICAV (the ICAV)

#### Objectives and Investment Policy

##### The Fund is managed by Waystone Management Company (IE) Limited (the Manager)

The Fund aims to achieve a competitive level of return by investing in fixed income securities. The Fund will attempt to achieve a return in excess of the ICE BofA 1-3 Year AAA Euro Government Index (EG11) (the **Index**).

The Fund is actively managed in reference to the Index. The main types of investments are bonds (or 'debt securities') issued by governments or corporate entities. The investments will be predominantly denominated in Euro and will be listed and readily tradable on a regulated market in any OECD country. The majority of the Fund's fixed income securities are unlikely to be components of and have similar weightings to the Index. The investment strategy does not restrict the extent to which the Fund's holdings may deviate from the Index and deviations may be significant. This is likely to increase the extent to which the Fund can outperform or underperform the Index.

The Investment Manager may use its discretion to invest in sectors not included in the Index. The choice of assets is guided by investment opportunities identified by a range of factors such as the maturity of the investment, the issuer of the security and the industry sector.

The Fund may also invest in assets such as time deposits, cash deposits, certificates of deposit or variable rate notes.

While the Fund generally intends to hold bonds that are rated investment grade it may hold bonds from time to time that are either unrated or below investment grade.

There will be two dealing days a month where investors can buy or sell shares in the Fund.

It is the intention of the Directors to distribute income on an annual basis.

For full investment objectives and policy details please refer to the full prospectus and supplement.

#### Risk and Reward Profile

The Synthetic Risk and Reward Indicator (SRRI) table demonstrates where the Fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but also the greater the risk of losing money. The lowest category does not imply that the Fund is risk free. The SRRI is based upon studies of how such investments have performed in the past and one should note that the Fund may perform differently in the future. The shaded area in the table below shows the Fund's ranking on the SRRI. The risk category shown is not guaranteed and may shift over time. The table uses a standard calculation method that is used by all UCITS funds.

We have used the performance history of the Fund in order to compute the SRRI for a 5 year period.

The SRRI of the Fund is in risk class 2. The Index is in risk class 3.

While the securities for the Fund will be investment grade at purchase, the Fund may hold non-investment grade bonds due to downgrade, but it is expected that this will constitute a very small proportion of the Fund.

Any investment in unrated securities will be confined to securities which in the opinion of the Investment Manager are of comparable quality to investment grade securities at the time of acquisition by the Fund.

The Fund operates in a risk managed, constrained manner with risk limits in place.

Further information on risk may be found under the "Risk Factors" section of the prospectus of the Fund.
